# Офисный работник

## Despre mine

In 2020 I graduated from high school. September 2016 through June 2017 I spent in The Netherlands, Eindhoven as an exchange student due to the support of YFU (Youth For Understanding) company. The main goals were to study Dutch and English, to be exposed to the European education system and to explore Dutch culture.

In 2022 I studied at the "Moscow Music School" majoring in "Music Business". The school gave me basic knowledge in drawing up estimates of events preparation, diversification of advertising budget, conclusion of contracts on copyright transfer, detailed preparation of a plan for the conduct of the project, deep understanding of musical label and distribution businesses. During the course, I had an internship in the creative studio "CATS Digital". The main tasks of the internship (1 month) were drawing up the tables in "Google Sheets", filling out contracts according to the template, searching and organizing information and references for the company's projects. Also I have some experience in telephone communications. September 2020 through May 2021 I worked as a broker in an investment company. I used to make calls to attract some new customers.

Hobbies:

- reading books
- playing the guitar
- singing
- producing some music performers
- management of a music telegram community and names "Geometry is not cool". This community operates as a music label, we create promotional campaigns for various music projects, compose posts and write articles.
- Коммуникация путем телефонных переговоров
- Холодные звонки
- Уверенный пользователь ПК
- Базовые знания сетевого маркетинга
